

PRESS RELEASE

HeliaLoop Launches Digital Referral Platform for Healthcare Professionals

Optimizing patient care through streamlined, secure, and trackable clinical referrals.

Konya, Turkey – July 2026

HeliaLoop, developed by Nechh Robotics, has been launched to make patient referral processes among healthcare professionals more organized, rapid, and traceable. HeliaLoop is a professional digital platform designed specifically for doctors, family physicians, medical specialists, clinics, and healthcare institutions. The platform aims to enable healthcare professionals to easily find suitable specialists, execute patient referrals digitally, and track the entire process from a single, unified interface.

Offering a modern digital workspace alongside traditional communication methods, HeliaLoop has been developed with a clean, user-centric, and secure infrastructure.

- **Specialist Search and Discovery:** Locate and connect with correct medical specialists instantly.
- **Digital Patient Referral Management:** Securely transfer referral details electronically.
- **End-to-End Tracking:** Monitor the status of referred patients from a single dashboard.
- **Secure Professional Communication:** Exchange information safely within a dedicated network.
- **Real-Time Notification System:** Get immediate alerts on referral updates and communication.
- **Multi-Language Support:** Seamless operation across different languages for global workflows.
- **Compliance & Security:** Built on an infrastructure compliant with global data privacy regulations (GDPR) and industry security standards.

About Nechh Robotics

Nechh Robotics is a technology company dedicated to driving digital transformation through innovative solutions in healthcare and legal technologies. By focusing on user experience, security, and connectivity, Nechh Robotics develops software solutions that streamline critical professional workflows.
