

PRESS RELEASE

JuriLoop Launches Next-Generation Digital Collaboration Platform for Legal Professionals

Enhancing legal workflow, secure communications, and seamless case referrals.

Konya, Turkey – July 2026

JuriLoop, developed by Nechh Robotics, has been launched to support professional communication, collaboration, and case referral processes for legal professionals. JuriLoop is a professional digital platform built for lawyers, law firms, and corporate legal departments.

The platform aims to establish secure communication among colleagues, streamline case referrals based on specific areas of expertise, and manage daily workflows from a single, centralized hub.

Tailored to meet the demands of modern legal services, JuriLoop offers legal professionals a highly efficient working experience through its intuitive interface and secure infrastructure.

- **Peer Discovery and Networking:** Find and connect with fellow legal professionals.
- **Attorney Search by Expertise:** Search for lawyers and specialists matching specific practice areas.
- **Case and Task Referral Management:** Safely refer files and share work across teams or networks.
- **Hearing and Calendar Management:** Coordinate court dates, hearings, and deadlines.
- **Secure Professional Communication:** Encrypted channels for professional discussion.
- **Real-Time Notification System:** Immediate updates on case status, schedules, and messages.
- **Multi-Language Support:** Localization and interface support for international operations.
- **Data Privacy and Integrity:** Secure infrastructure built in compliance with international data protection laws (GDPR) and strict legal confidentiality standards.

About Nechh Robotics

Nechh Robotics is a technology company dedicated to driving digital transformation through innovative solutions in healthcare and legal technologies. By focusing on user experience, security, and connectivity, Nechh Robotics develops software solutions that streamline critical professional workflows.
